

AMENDMENTS TO THE SPECIFICATION

Please amend the specification by replacing the title with the following amended title:

--PROJECTION DISPLAY APPARATUS FOR DISPLAYING IMAGE ON NONPLANAR
SCREEN WITH A PLURALITY OF PROJECTION DISPLAY UNITS--

Please amend the specification by replacing the paragraph beginning on page 11, line 32 with the following amended paragraph:

The positional information of an audience may be gathered by setting the three-dimensional measuring unit 17 at the position of the audience, or by assuming virtual positional information for the three-dimensional measuring unit 17. Namely, a display image seen from the position of an audience may be normalized without considering the actual eye points of the monitoring cameras of the three-dimensional measuring unit 17.
